URINARY CATHETER FIXATION STRAP

Fortune® Urinary Catheter Fixation Strap:

Fortune® Medical Urinary Catheter Fixation Strap is designed to secure urinary catheter in place and to avoid skin irritation from medical tape. The strap fits comfortably to the patient’s leg if wearing a long-term urinary catheter and also it is easy to use and simplify adjustment at desired position. In addition, it can reduce the risk of urinary catheter accidental dislodgement to avoid urethral irritation and infection to improve quality of life for patient.

Intended Use:

Urinary catheter fixation strap is mainly fixed urinary catheter and increases patient comfortable on the leg. The most important is that it can avoid urinary catheter accidental dislodgement and urethral irritation and infection.

Features:

- Urinary catheter fixation strap can easily be fixed at desired position.
- The most sizes of urinary catheter can be fixed on the strap.
- Urinary catheter is not easy dislodgement from the fixation strap to reduce potential infection chance.
- The hook-and-loop locking system is easy to use, placement and remove.
- The ultra-soft cloth material make patient leg skin-friendly.
- Washable and reusable.
- Saving time for nurse.
