

CATHETER SPIGOT

Close The Foley Catheter Securely and Hygienically

UROLOGICAL
SERIES

CATHETER SPIGOT

Catheter Spigot:

Catheter Spigot is used to stop flow for catheters hygienically. It is non-invasive sealing the catheter for a short time to allow urine to collect in the bladder.

Intended Use:

For closing catheters and tubes that control urination, thereby training the activity of the sphincter (self-voiding).

Features:

- A plastic stopper for catheters provided sterile in sealed, individual packages.
- Universal size is molded to fit all sizes of catheters or tubes.
- The structure of spigot is strong and secure.
- The spigot is a single use item and is supplied sterile.
